I-SMALL SCALE EMBEDDED GENERATION ISUKE KAKUHLE

linyanga ezintandathu sezidlulile emva kokumiselwa kwesikhokelo se-Small Scale Embedded Generation (SSEG) yaseOverstrand. Kufunyenwe izicelo ezininzi kwaye nomdla uyakhula.

Isikhokelo saseOverstrand se-Small Scale Embedded Generation sinika ithuba bonke abasebenzisi abaneendawo ze-SSEG ukuba benze izicelo ze-grid-tied. Oku kuquka ukuba abasebenzisi abanjalo benze isicelo semvume kamasipala wokuba bafake i-meter e- "bi-directional" babuyekwezwe

ngenyunithi nganye ebuyiselwe kwamasipala kusetyenziswa ixabiso elamkelekileyo ngonyaka. Into ebalulekileyo ekufuneka uyigcine kukuba ube ungumsebenzisi oyi-NET. Oku kuthetha ukuba awunakubuyisela iyunithi ezingaphezulu kwezo uzisebenzisayo.

Njengoko kuchaziwe apha ngentla isikhokelo i-SSEG sinika ithuba lokuba grid-tied, kodwa kusekho abasebenzisi abazitsalela ngokungekho mthethweni. Apha senza isicelo kubo bonke abasebenzisi ukuba mabaqinisekise ukuba

bayifumene imvume efunekayo phambi kokuba banxibelelane nobuxhakaxhaka bethu. Ukususela ngomhla wo-1 July 2016, izohlwayo ngokusebenzisa i-SSEG ngokungekho mthethweni ziqalise ngokomthethwana kamasipala wobonelelo ngombane. Oku kutsala umbane ngokungekho mthethweni kuza kujongwa ngendlela efanayo neyaluphi na uhlobo lokutsala ngokungekho mthethweni. Ukungayithobeli imithetho kamasipala kuya kukhokelela ekuqhawulweni kweenkonzo nomdliwo wokuphazamisana nombane.

Umdlalo wokuphazamisana nombane kunyaka-mali 2016/17 uhamba ngale ndlela ilandelayo:

E14	UKUTSALA NGOKUNGEKHO MTHETHWENI / UMDLIWO NGOKUPHAZA MISANA NOMBANE (kuquka ukonakala okanye ukudlula kwe-DSM Hot Water Cylinder Control Unit)				E18	I-Small Scale Embedded Generation (SSEG) Le ntlawulo ifumaneka kuphela kunxibelelwano i-SSEG oluvunyelweyo xa abathengi bethshintsha iibhokisi zabo ezincinci (kWh) kwamasipala, oko kuxhome-keke ekubeni ibhokisi abayithengayo iyadlula kweyabo (kWh). Eli xabiso liza kusebenza kuphela emva kokuba isikhokelo sakwaNERSA (National Energy Regulator of South Africa) sifunyenwe. Umsebenzisi uza kuhlala kwixabiso lakhe elisebenzayo kwaye oku kulandelayo kuza kusebenza:
E14A1	Xa uqala	R	3 409,00	Ayikho i-VAT	E18A2	Ixabiso elingenayo
E14A2	Okwesibini (E14A1 x 2)	R	6 819,00	Ayikho i-VAT		c 54,00 61,56 ELITSHA ELITSHA
E14A3	Okwesithathu nasemva koko (Ukuqhawulwa nentlawulo yokulungisa = intlawulo yetyala langaphambili ihindaphindwe)	R	Intlawulo yamatyala angaphambili x 2	I-VAT		
				VAT		

Isibenza kanjani imbuyekezo?

Umthengi uza kuhlalulela ukufakwa kwe-meter e-bi-directional ngokwamaxabiso kamasipala onyaka amkelweyo. Abasebenzisi abasebenzisa i-meter ezihlawulwa kwamasipala baza kuqhuba kanjalo ukuze abawuthenga ngekhadhi umbane baza kuphindiselwa kwi-meter ehlawulisa kwamasipala. *Ityala lekhyala lesiqhelo i-SSEG liza kubonakalisa oku kulandelayo: (lingabikho ixesha lokusebenzisa)*

- Intlawulo esisiseko yenkonzo yenyanga
- Intlawulo yenyanga yobuxhakaxhaka
- Iindleko zokusebenzisa ngokwamaxabiso ayibhloko
- Iiyunithi ezibuyiselwe kwi-grid kamasipala x ixabiso elamkelekileyo (uyabuyiselwa)

Nceda uqaphele, abathengi abanqwenela ukufakela i-SSEG nokuba ingakananani na mabazalise ifomu yokwenza isicelo ukuze imvume ebhaliweyo icelwe kuMasipala phambi kokuqala kwenkqubo, ukuthengwa kwayo nokufakelwa kwayo. Inkqubo yokwamkelwa kwesicelo sokufakela i-SSEG iza kwahluka, kuxhomekeke kubukhulu bayo nenqanaba lomsebenzisi.

Isicwangciso sikaMasipala waseOverstrand seprojekthi yobuxhakaxhaka seminyaka emihlanu

UMasipala waseOverstrand uceba ukusebenzisa isicwangciso sakhe soku-phucula iindlela kule ndawo. Umlawuli woBuxhakaxhaka noYilo uStephen Müller unike iinkcukacha ngesicwangciso sika-masipala neengxoxo ezibanjwe neSebe leZithuthi nemiSebenzi yoLuntu (DTPW) malunga nokuphuculwa kuka-R43 phakathi kweOnrus neSandbaai nezidibanayo iOnrus/Kidbrooke neSandbaai.

Umnu. Muller uqinisekise ukuba kukho iiprojekthi ezimbini ezinkulu ezicwangciselwe iminyaka emihlanu ezayo. nye kukuqhubeka nendlela ehamba ecaleni eHermanus (kweli cala lingaselwandle kwindlela u-R43) ukudibanisa iidolophu ngokwakha ibhulorho yesibini kumlambo iOnrus.

Iindlela esecaleni eHermanus yenye indlela eya ku-R43 kwaye ekugqibeleni iza kudibanisa iVermont, iOnrus, iSandbaai, iZwelihle,

iMount Pleasant neWestcliff kwiHermanus CBD neendawo ezimbini zoshishi-

no zaseHermanus. Ie projekthi yinxalenye yesicwangciso esidityanisiweyo sezothutho sikamasipala ukususela kowama-2010 kwaye ihambelana neOverberg District Mobility Strategy Concepts Report (Juni 2011).

• **Isigaba sokuqala** seprojekthi esa-ziwa njengeMbeki Road, sagqitywa ngowe-2013 kwaye sihamba phakathi kweendlela iSwarddam neSchulphoek. Esi sigaba sidle izigidi ezili-R13,3.

• **Isigaba se-2 siyaghuba** kwaye si suka kwindlela iSchulphoek siye kwindlela iSandbaai ecaleni kwesitrato iBergsig. Esi sigaba siyinxalenye yokuphuculwa kweendlela zodederhu lweevenkile ezintsha eSandbaai. Umakhi wolu dederhu wakha esi sigaba.

• **Isigaba se-3** siya kuquka ukuphuculwa kweendlela iBergsig ukusuka kwindlela iSandbaai Main Road ukuya eOnrus River. Esi sigaba siya kuthat-athwa kunye nophuhliso lwethanga laseSandbaai.

• **Isigaba se-4** siya kuba kukwakhiwa kwebhulorho entsha kumlambo iOnrus ukwenzela ukuwelela kwiOnrus Main Road.

• **Isigaba sesihlanu** siya kuba kuku-phuculwa kweendlela edibanisa iSwarddam Road neHermanus CBD. Kujongwe izinto ngezinto koku kudibanisa.

Intlawulo eqikelelwayo yale ndlela yase-Hermanus imalunga nezigidi ezimalunga ne-R155. Ubonelelo ngemali lwale projekthi lufumaneka ikakhulu kwimirhumo yophuhliso nakwiMunicipal Infrastructure Grant (MIG). Inkulumbuso yaseNtshona

Kapa ibonelele ngemali yokwakha iindlela zenyawo nezeebhayisikile ecaleni kweMbeki Road. Umasipala ukwathetha neDTPW (iSebe leZothutho neMisebenzi yoLuntu) ngenjongo yoncedo olunokufumaneka.

Enye iiprojekthi enkulu uMasipala wase-Overstrand ajonge ukuyigqiba kule minyaka mihlanu sisibonelelo ngezothutho kuluntu lwaseHermanus ebisoloko ically kule minyaka ingama-20 idlulileyo. Ikuqa irenki yee-taxi zaseHermanus njen-genxalenye yokuhlaziya kweprojekthi yeCBD.

IXESHA: 08:00 KUSASA DE IBE NGU-15:00 EMVA KWEMINI

UMHLA: 07 & 08 MATSHI 2017

NgoLwesibini umhla we-7 Febuwari 2017, uSodolophu waseOverstrand uRudolph Smith, uMphathiswa wezokuhlalisa uluntu waseNtshona Kapa uBonginkosi Madikizela nooceba abohlukeneyo banikezele izindlu kubantu abadala baseMshenxiswa Village eZwelihle.

wendlu. "Ndiziva ndisikelelele ukufumana indlu kwaye ndazi ukuba yeyam," utshilo uMzwandile. Ubulele wonke umntu obeyinxalenye yokuba afumane indlu.

Abasele bekhulile uWellington noSiyo Varoyi ababanga nakulufihla uvuyo lwabo xa bevala umnyango wendlu yabo entsha. UNolovile Manqeza, uVan noNovusile Ndzule, noMfundo noAlvet Sithetho nabo bebevuya njengabanye xa befumana izitshixo zabo zezindlu zabo. Bathe ibilusuku olumandi ekukudala belulindele.

Kwintetho yakhe yokwamkela abantu uSodolophu uSmith ukhuthaze abanini-zindlu uthe "nize nizigcine kakuhle ezi zindlu zintsha - ngoku zizindlu zenu ngako oko kufuneka nizikhathalele".

USodolophu uSmith ucege abafumene izindlu ukuba bangazithengisi izindlu zabo. "Ukuba uyithengisile iza kuba yilahleko enkulu kuwe nakwizukulwana sakho, ndiyavuya ngokuba abantu ke ngoku beza kuba nendawo abaza kuyibiza ngebhongo ngokuba likhaya. Ekugqibeleni wena nabantwana bakho ninendawo ekhuselekileyo eninokubuyela kuyo ebusuku kwaye anixhomekekanga ngoku kusapho nabahlobo ngethuba lemozulu embi," utshilo.

Kananjalo wothulele umnqwazi kowayesakuba ngusodolophu phambi kwakhe uAld Nicolette Botha-Guthrie wabulela nomphathiswa, ooceba, iikomiti zeevadi, iikomiti zomanyano loluntu noluntu ngentsebenziswano yabo nomsebenzi wonke abawenzi-leyo ukuza kuthi ga ngoku ukuphucula umgangatho wobomi waba bahlali batsha.

IZINDLU EZINTSHA ZIZISA IMIGCOBO KWIINTSAPHO

'Izitshixo zendlu zivula amasango ngamasango ekamva elingcono'

Kwintetho yakhe ephambili uMphathiswa uMadikizela uthe ukusalela ngasemva kwezindlu eNtshona Kapa kuphakamile kwaye kuyakhula njengoko abantu besiya besongezeleka kweli phondo bekhangela ubomi obungcono nobukhuselekileyo ekungenzeka ukuba bafuna nemisebenzi.

"Ukuba ibhijethi iyasivumela siza kuqhuba sisenza iinzame kangangoko ukuqinisekisa ukuba kufumaneka amathuba ongezolekileyo okubonelelela ngezindlu kwabo bamele kuzifumana - kodwa kufuneka xa sisaba izindlu siqinisekise ukuba zifunyanwa ngabantu abamele kuzifumana.

Ukunikezelwa kwezindlu asiyonto izimele yodwa njengesicwangciso kwaye yinto ecotha kakhulu. "Ngoku sakha izindlu ngaxalinye sigalile ukufaka izibonelelo ematyotombeni ukuqinisekisa ukuba siyabuphucula ubomi bomntu wonke okhethe ukuhlala eNtshona Kapa," utshilo.

Kuninzi lweendawo zamatyotombe abahlali bajongana nemingeni yobomi esisiseko equka ukungabinazo izibonelelo zasendle namanzi, inkunkuma nemililo yamatyotombe esoloko isonakalisa.

"Izitshixo zivula amasango ngamasango ekamva elingcono. Kwaye siyazi ukuba abarhali, abantu abamkela phakathi kwama-R3 000 ne-R15 000 ngenyanga abanegalelo kuqoqosho abanalogelo lendlu esimhla kwaye abanakubolekwa mali yibhanka.

"Ngako oko ayikokwakha izindlu nje kuphela koko kukudlulisela umhlaba ebantwini. Sifuna ukuba ngobuninzi kangangoko abantu mabanikwe ithuba lokuba nomhlaba.

"Kungeso sizathu singenakubanyanzela abantu ukuba bathengise imihlaba yabo ingakumbi ngoku ngeli xesha izindlu zithengiswa kakuhle kwaye sibakhuthaze abantu ukuba bathathe inxaxheba ekuthengiseni kwezindlu.

"KODWA abantu mabaliqonde IXABISO lendlu kwaye kufuneka sithethe ngale nto sibafundise bonke abahlali. Abanini bemihlaba abatsa kufuneka baqiniseke ngexabiso lezindlu zabo phambi kokuthatha isigqibo sokuthengisa.

"Ndusika kwinto yokuthengiswa kwendlu ithengiselwa abantu ababini," utshilo uMadikizela. "Kananjalo asinakubavumela abantu ukuba bathengise izindlu zabo nge-R10 000 babuyele etyotyombeni. Ngako oko ukweyona meko yakha yambi kunangaphambili."

• Ukunikezelwa kwezindlu eMshenxiswa Village luphawu lokugqitywa kwesigaba 1 se-Upgrading of Informal Settlements Project (UISP). Ikwakuba nokusungulwa kwe- (BNG) kwiziza ezithathu iMshe Village, iSite C2 ecaleni kweSwardam Road (iiyuniithi ezili-132) neHousing Admin Site eStil Street (iiyuniithi ezili-164).

UNolovile Manqeza ukhangeleka esi siganeko sokwamkela indlu yakhe ngokusesikweni simongamele. Ukunye noBonginkosi Madikizela noSodolophu uRudolph Smith.

UMfundo Mpepe Sithetho nenkosikazi yakhe uAlvet ekunye noSodolophu uRudolph Smith noSekela-Sodolophu uDudley Coetzee.

ISIMEMO KUMBONISO WENKUNKUMA

U-Whale Coast Conservation (iINGO exhaswa nguMasi-pala waseOverstrand) usungula Inkqubo yeenyanga ezi-2 zenkunkuma. Injongo kukwenza abahlali bazi ngeengxaki ezibangelwa yinkunkuma neendleko zokuyilahla. Ikwanika iingcebiso eziluncedo zendlela ongayicutha ngayo inkunkuma oyivelisayo. Eli phulo liza kusungulwa kumsitho oza kuthatha imini yonke ngoLwesithathu umhla wo-1

Matshi 2017 (09.00 ukuya kweye-16.00) phambi kweOdithoriam kaMasipala. Iingcali ziza kunika iinkcukacha ngenkunkuma nangeendlela zokuyicutha. Izifundo nemiboniso iza kulungela abatsha nabadala. Wonke umntu wamkelele kwaye akukho ntlawulo. Lo msitho uhlawulelwa yiNational Lotteries Commission. Kuza kuba kho iti nekof. **Xa ufuna ingcaciso eyongezelelwayo nceda unxibelelane noWhale Coast Conservation 028 316 2527 okanye u-wcc.greenhouse@gmail.com okanye u: anina.wcc@gmail.com.**

I-tsunami enkulu yeplastikhi kunxweme lwethu

Okubonakala kumntu wonke kutyekezelwe ngaphandle kunxweme lolwandle lwethu iplastikhi ngumbono owoyikekayo oyinto nje encinci yoko kwenzeka kwiilwandle zehlabathi.

Njengomntu oqhele ukuhamba elwandle encedisela ekucoceni unxweme ndingayichaza ngodano olukhulu into yokuba imeko iya iba mbi kakhulu.

Ngeli xesha sisothuka oku

kungcolisa kweplastikhi kumanxweme ethu ingangumzekelo wento eza kwenzeka xa umntu ecinga ngeengxelo ngamanxweme eIndiya, eHawaii naseIndonesia, umzekelo.

Ndiyazi ukuba uyazi ukuba ama-85 ukuya kuma-90% enkunkuma yaselwandle yiplastikhi kwaye ukuqwalasela ukuba iplastikhi yavela ngeminyaka yoo-1950 kodwa ngoku umonakalo oyenzayo uyoyikisa.

Malunga nezigidi ezingama-300 eetoni zepplastikhi ziyaveliswa qho ngonyaka ukuze ama-50% ibe yiplastikhi esetyenziswa kube kanye. Oku kufuneka sikucithe kakhulu. Qho ngonyaka ziiitoni ezizizigidi ezisibhozo zepplastikhi ephela elwandle ize ibole ibe zizicwibi ezincinci ezingathi yinto yokuhombisa. Ezi zicwibi zikhupha ii-thoksin ezingena elwandle zenze ukungcola. iintaka neentlanzi zitya ezi zicwibi zisenza impazamo zicinga ukuba kukutya. Umeke ukuba suwugashisile ukuba zizinto eziphilayo eziphambili ekutyeni iplastikhi elahlileyo. Injani ukuba yimpono loo nto?

Ungenza ntoni? Khetha ezinye izinto endaweni yeplastikhi. Khetha izinto ezifana neglasi, ingca, imveliso ye-bamboo neyomwoba. yala ukuthenga izinto ezibotshwe kakhulu. Thenga iziqhamo nemifuno engabotshwanga. Lumkela i-polystyrene kwiindawo zokutya okukhawulezayo. Inkunkuma yilahle ngendlela enenkathalo, uyisebenzise kwakhona apho oko kunokwenzeka. **Xa ufuna Izimvo ezongezelelekileyo neenkukacha tyelela uFacebookpages of 'Rethink Single Use Plastics', 'Reduce waste to landfill' and 'Blight of Plastic'.**
