**Incwadi ethunyelwa amalungu e-Bhunga le Overstrand esesikweni**

## OOMAKHWE- KHWE BAHLONITSHI- WE KUMSITHO WAMAWONGA KASODOLOPHU

(Ongasekunene) NguSean Privett weWalker Bay Fynbos Conservancy ofumene iwonga elijikelezayo eliyiMayor's Floating Trophy for Environmental Conservation.

Ngokuhlwa kwangoLwesine, womhla wesi-3 kuOktobha, uSodolophu Dudley Coetzee usindleke umsitho wamawonga kaSodolophu waqho ngonyaka waseOverstrand oyiMayoral Awards Ceremony ukhlonipha loo madoda namabhinqa asekuhlaleni aye athi, nakuba nje bexakeke gqitha kubomi babo, batshatshela ngakumbi kwizenzo zabo zemfane. Ngenxa yezenzo zabo, basebenze gqitha ukuphuhlisa nokuxhobisa abahlali beendawo zasekuhlaleni kwabo.

**KuDidi 1: ngabaPhumelela emaGqabini**, abaphumelela ngokudibeneyo yayinguYorika Rabie wePurple Angels noNatasha Bruiners weCatapult Foundation. Ibhaso lokuwonga elijikelezayo eliyiMayoral Trophy for the Woman of the Year laya kuJami Kastner (waseButterfly Centre), laza ibhaso elijikelezayo eliyiFloating Trophy for Environmental Conservation laya kuSean Privett (waseWalker Bay Fynbos Conservancy). UDi Rattle waseHermanus Breweries, waseOld Harbour Bee, waphumelela **kuDidi 4: IwaBaphumeleleyo kwezoShishino**, waza uPeter Kastner waseStandford Hills Estate waphumelela **kuDidi 5: loPhuhliso lweZokhenketho**. U-Izaan Newman waseGansbaai Academia waphumelela **i-2019 Junior Achiever**, lo gama uGqr. Anina Lee noRobin Lee bafumana i-Achiever of Excellence: Lifetime Award. Iinkcukacha zabaphumeleleyo namagalelo abo kuluntu lwasekuhlaleni kwabo bayafumaneka ku- <https://www.overstrand.gov.za/en/media-section/news/> Abanye abafikelele emaphethelweni babebandakanya uCeleste Loriston, uMarhette van Huyssteen kunye noAnette Kahts (iKomiti ebhale iBali); uMichael Neville Auston (weBottfriends nePEG); uSuretha Cloete (wasePhoenix Project); uMelissa Krige-Saayman (wasePlatbos Forest); kunye noMisha Teasdale (waseGreenprop).

Abasemfanekisweni bekunye noSodolophu wesiGqeba soLawulo uDudley Coetzee bafumene amabhaso kaSodolophu i-2019 Mayoral Awards: Abangasemva ngaba, ukususela ngasekhohlo ukuya ngasekunene, uJorika Rabie wePurple Angels (ophumelele ibhaso lokugqwesa i-Achiever of Excellence Award), u-Izaan Newman waseGansbaai Academia (webhaso lokugqwesa i-2019 Junior Achiever), uSean Privett waseWalker Bay Fynbos Conservancy (ibhaso lokugqwesa eliyi-Floating Trophy for Environmental Conservation), kunye noPeter Kastner waseStandford Hills Estate (ibhaso lokugqwesa eliyi-Tourism Development Award). Abangaphambili ngaba, ukususela ngasekhohlo ukuya ngasekunene, nguDi Rattle waseHermanus Breweries, abaseOld Harbour Beer (ibhaso lokuwonga i-Entrepreneurial Achievement Award), uGqr. Anina Lee (ibhaso lokuwonga eliyiAchiever of Excellence: Lifetime Award), uNatasha Bruiners waseCatapult Foundation (ibhaso lokuwonga i-Achiever of Excellence Award), uGqr. Robin Lee (ibhaso lokuwonga i-Achiever of Excellence: Lifetime Award) kunye noJami Kastner waseButterfly Centre (ibhaso lokuwonga eliyiWoman of the Year).

### Imilinganiselo yemvula esezantsi ichaphazela iDe Bos dam

Ukusuka kubusika bowe-2015, ingingqi yaseNtshona Koloni yayisoloko iphakathi kwembalela enkulu yaye umlinganiselo wemvula waba ngosoloko ungaphantsi komlinganiselo.

Iimvula zasebusika zango-2016 no-2017 zenze kancinane ukunika isiqabu. Ukususela ekuqaleni kukaNovemba 2017, uMasipala waseOverstrand kwanyanzeleka ukuba aphumeze imiqathango engosetyenziso lwamanzi yenqanaba 1 kummandla oMkhulu waseHermanus. Ukususela ngowe-1 Juni 2018, imiqathango engosetyenziso lwamanzi yenqanaba 2 kwanyanzeleka ukuba iphunyezwe, kubandakanywa nenqanaba lokuqala lemiqathango ngezosetyenziso lwamanzi kummandla we-zolawulo lwaseHermanus kuphela. Ukususela ngoko, ubusika bango-2018 kwakunye nango-2019 ukuza kuthi ga ngoku kuze nomlinganiselo womyinge ongezantsi.

### Umlinganiselo wemvula nokufuneka kakhulu kwamanzi

Ukususela nge-1 Januwari 2019 ukuya ekupheleni kukaSeptemba 2019 yaye kuphela yi-340 mm yemvula erekhodwe eHermanus, xa kuthelekiswa nomyinge wethuba elide we-502 mm wethuba likaJanuwari ukuya kuSeptemba. Umlinganiselo womyinge wethuba elide waqho ngonyaka waseHermanus ngu-620 mm. Kuphela yi-510.4 mm yemvula erekhodwe ngo-2015, yayi-526.3 mm ngo-2016, yayi-502.9 mm ngo-2017, kunye ne-520.2 ngo-2018.

Abemi baseHermanus basebenzisa kakhulu ekongeni amanzi kwisithuba seminyaka eyi-10, kungakhathaliseki kukhula ngokukhawulezileyo qho ngonyaka koluntu ngeli thuba. Imfuneko yamanzi okusela akhuselekileyo ukusela ngo-2018/19 yayingu-10.1% (i-409 000 kl) nganeno kunango-2015/16.

### Inqanaba lomlinganiselo wamanzi edama iDe Bos

Ngokucacileyo, umlinganiselo wemvula ongaphantsi komyinge uyichaphazele kakhulu iDe Bos Dam. Eli dama lisengowona mthombo obaluleke gqitha wamanzi amaninzi aseHermanus, yaye ngoku lizalise kuphela umthamo we-44.2%, njengokuba ubusika busiya ekupheleni ngephanyazo. Indawo yokuqokelela amanzi yaseDe Bos Dam, eku-31 km2, incinane noko kunaleyo, umzekelo, elinganayo nayo ngobukhulu yaseKraaibosch Dam (indawo yokuqokelela amanzi eyi-208 km2). Ngaphezulu, ngenxa yomthamo walo, inqanaba lomlinganiselo wamanzi aseDe Bos Dam alinakuthelekiswa, umzekelo, nelo lamadama iBuffelsrivier nePearly Beach, kuba la mabini asandula ukuchazwa amadama anemilinganiselo emincinane, yaye umlinganiselo wemvula kwezinye iindawo awukhange ube sezantsi njengokuba kunjalo kummandla waseHermanus.

### Ukusalwa kwamanzi angaphantsi komhlaba

Iingxuma yezitsala-manzi eziyi-10 ezisa amanzi eHermanus isetyenziswa kakhulu, yaye ifaka igalelo kwizigidi zeelitha zamanzi amaninzi kakhulu eziyi-2 456 eziya kwinkonzo yokuzisa amanzi amaninzi ukususela ngo-Oktobha 2016, ngaphezu kwe-30% yemfuno yonke kwithuba elo, ngaloo ndlela kwafaka igalelo ekulondolozweni kwenqanaba lomlinganiselo wamanzi leDe Bos Dam.

Kugrunjwe imingxuma yezitsala-manzi ezintsha sele igrunjwe ngempumelelo kwiinyanga ezimbini ezidlulileyo eGateway field well. Le mingxuma yezitsala-manzi ngoku iyavavanywa, emva koko kuya kukaciswa ngezixhobo zokusebenza neemilo zazo zinokuqunjelwa ukwenzela ukuba kuqunjelwe neethenda ezazibizwe ukwenzela ukuba zigqitywe yaye zivinywe njengemingxuma yezitsala-manzi ajongene nokunikwa imvume njengemingxuma ezizitsala-manzi zokusebenza.

Kuqikelelwa ukuba imingxuma yezitsala-manzi iya kuqalisa kwimveliso kwikota yesibini ka-2020.

Izifundo zophando ngokunokwenzeka sele ziqhubele phambi ukuphumeza inkqubo yokujikwa kwamanzi aselwandle eHermanus asetyenziswayo kwisithuba sexesha eliphakathi.

### Imiqathango ngezosetyenziso lwamanzi

Imiqathango ngezosetyenziso lwamanzi njengenathelo lethutyana ukuthibaza ukusetyenziswa ngokugqithileyo kwamanzi, nokulondoloza inqanaba lomlinganiselo wedama. Oku kukhokelela ekuncitshiseni kokusetyenziswa kwemiqathango engosetyenziso lwamanzi akenzi, ngoko ke, mvuzo ungaphezulu kaMasipala.

Kwilinge elithe rhoqo lokusetyenziswa kwemithombo yamanzi wethu, uMasipala waseOverstrand ubongoza bonke abemi baseHermanus ukuba bancede bangatengi kwi-miqathango engosetyenziso lwamanzi yeNqanaba 3 eya kuqalisa ukusebenza ngowe-1 Novemba 2019.

Usetyenziso lweenkqubo zokuncenkeshela nemibhobo yamanzi akuvumelekanga kude kuphinde kwaziwe kwakhona, kuphela kukusebenza ngamanzi kuphela akumabhakethe okanye amakani okuncenkeshela.

**Qaphela, kwakhona, ukuba izithuthi neebhowuthi zinokuhlalwa ngebhakethi nelaphu kwanokuba ukuthshiza ngophayipi kwiindawo ezitshela kalukhuni okanye ezipheviweyo akuvumelekanga. Ukuzaliswa kwamaqula okuqhuba akuvumelekanga.**

Ixabiso elingqinyweyo elijongene nosetyenziso lwamanzi lwasekhaya libebezisa ukuya kutsho ku-6 kl ngenyanga alinyukanga, kodwa ukususela ngoJuni 2018 amaxabiso aqingqiweyo osetyenziso lwamanzi lwasekhaya angaphezu ko-6 kl onyuka ngo-30%. La maxabiso aqingqiweyo aya kuhlala esebenza kakuhle ngokuphunyezwa kwemiqathango yokusebenza kwamanzi yeNqanaba 3.

Ngelishwa, kude kufike ixesha apho iDe Bos Dam ifikelela kwinqanaba elamkelekileyo lobuncinane be-70%, imiqathango engosetyenziso lwamanzi namaxabiso aqingqiweyo athintelayo kuya kunyanzeleka ukuba ahlahle esebenza, yaye ukuphunyezwa kwemiqathango engqongqo kunokunyanzeleka ukuba inikwe ingqwalaselo kwithuba elifutshane.

**Umyezo wezendalo**  
**i-Fernkloof Nature Reserve:**  
 AmaXesha okuVula 06h00 - 19h00  
 EBusika 07h00 - 19h00

**Umyezo wezendalo i-Fernkloof Nature Reserve**  
**Nkqo entloko ngentsimbi yesithandathu kusasa**

Ngenjongo yokubhiyozela ihlobo, umyezo wendalo i-Fernkloof Nature Reserve uya kuvula amasango kwiye engaphambi koko, yaye iiyure zokuvula (06:00 - 19:00) ziya kuhlala zisebenza kude kube ngumhla we-20 March 2020.

Kungenwa simahla epakini.  
 Kukhunjuzwa abanxule izinja ukuba bahambe kwiindlela eziblowu kuphela. Izinja mazisoloko zisentanjeni ngawo onke amaxesha yaye kufuneka lisusiwe ilindle lazo.

**UKHE WAYITYELELA MVANJE IWEB-**  
**HUSAYITHI YASEBURHULUMENTENI**  
**YASE-OVERSTRAND?**

Singathanda ukukhuthaza abemi bethu ukuba bangene kwiwebhusayithi yaseburhumelenteni kamasipala wethu apha [www.overstrand.gov.za](http://www.overstrand.gov.za), le webhusayithi ihlaziywa qho ngeveki yaye, ngamanye amaxesha, yonke imihla, ngokuxhomekeke kwimeko kubunjani beenkcukacha ezichaziweyo.

Ngokupheleleyo, injongo yale webhusayithi kukunika ingxelo ngokwenziwa ngumasipala nokugcina uluntu lusazi yaye lwaziwe ngokwenzeka kwiziganeko okunokubaxhalabisa.

**Ukuba unqwenela ukwenza amagqabantshintshi ngokuqulathwe kunye/okanye ngokusebenziseka kwewebhusayithi yaseburhulumenteni, kucelwa ukuba uthumele i-imeyili ku: [tzweni@overstrand.gov.za](mailto:tzweni@overstrand.gov.za)**

**uHawston Cadets uqubisana**  
**nengxaki yenkunkuma yasePaddavlei**

Qho ngonyaka, ngoMgqibelo wesithathu kuSeptemba, amavolontiyi kwiHlabathi liphela ayamanyana ekuncedeni kususwa nya kumanxweme izinto ezingajongekiyo nenkunkuma eyingozi, zonke ezi zinto ziyingozi, nezithi xa zizonke zisotwe yaye zisetyenziswe kwakhona apho kunako.

Ekusondeleni kwalo mhla, i-Overstrand's Environmental Management Services (EMS), the Paddavlei Eco-group (P.E.G.), Working for the Coast kunye neqela lezinye ii-NGO zabambisana neHawston Cadets ukunceda ekugutyuleni iindawo ezingqongileyo. UMarco Cornelius (Overstrand EMS) noMichael Henn (Working for the Coast) bathi bothuke kakhulu ukubona ubungakanani benkunkuma esusiweyo kuloo nkqubo: nayiphi na into ukususela kwiibhotile zewayini ukuya kwizinto zokuphatha ukutya, iibhotile neziciko zeziselo, iiplastiki, kunye nezijungqe zesigarethi, singayilabala kanjani -ipolisterini eyakheleneyo kumashumi ngamashumi eminyaka eyadlulayo.

Ibutho iHlabathi lenze owona msebenzi mninzi, nangona, oko kukhokelele ekuzalisweni kweengxowa eziyi-40 ngenkunkuma esuswa kumlanjana nakwizityalo ezingqongileyo. UMarco Cornelius (Overstrand EMS) noMichael Henn (Working for the Coast) bathi bothuke kakhulu ukubona ubungakanani benkunkuma esusiweyo kuloo nkqubo: nayiphi na into ukususela kwiibhotile zewayini ukuya kwizinto zokuphatha ukutya, iibhotile neziciko zeziselo, iiplastiki, kunye nezijungqe zesigarethi, singayilabala kanjani -ipolisterini eyakheleneyo kumashumi ngamashumi eminyaka eyadlulayo.

Nakuba kunjalo, uNjokwana nabququzeli abangoogxa bakhe babengawuvuli umlomo bencoma ukuzimisela nenkuthalo yabo kwakunye nempumelelo yephulo lokucoca.

*Kothulelwa umnqwazi ngokukodwa bonke abo bancedisileyo ukususa nya ePaddavlei nakwiindawo ezijikelezwe ziinduli ngeenduli zenkunkuma*

**Uqatshelo kwangethuba kwesoyikiso**  
**i-shotholeborer (ibhungane elimnyama)**

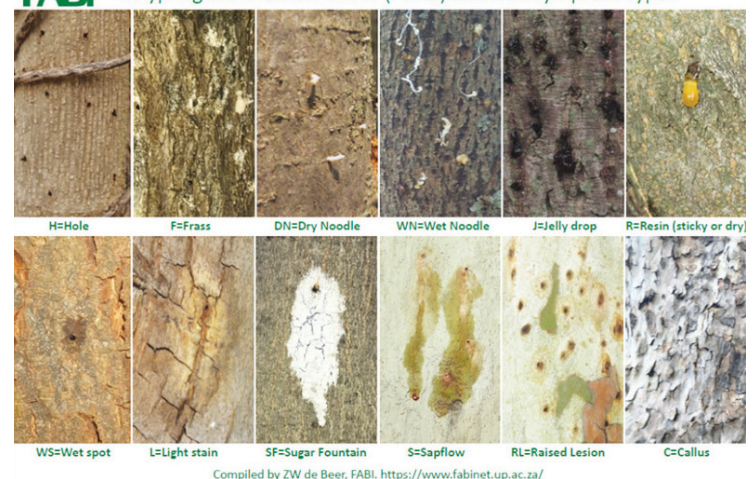

Kutshanje, umlimi-myezo (horticulturist), uLauren Rainbird, weziko i-Bio-technology Institute (FABI) uza kujonga iindlela zokulwa isoyikiso esiza nebhungane elimnyama, aze athathele ingqalelo inkqubo esele yenziwe ukuza kuthi ga ngoku ngokuphathelele koku.

I-shotholeborer ibhungane elimnyama elincinane elitshabalalisayo elilincinane kunesinambuzane esiyisesame seed esigrumba amatonela kwimithi emininzi ukubeka amaqanda lisasaze nomngundo othintela indlela yokuhambisa komthi iinkqubo zawo zangaphakathi zokutya. Umngundo obo kumatonela uphazamisana nokunikwa kwamanzi nezakhamzimba eziya emthini, ubangela ukuba isebe life ngasemva nasencamini ligqibele ngokutshabalala. Ezona mpawu ziqhelekileyo zemithi esulelekileyo yintlaka okanye ulwelo oluphuma kwixolo kwimngxuma yokuphuma nokungena (zincinane kangange-1 mm kububanzi, zikhupha into egokelelanayo buswekile, umthi ogubekileyo (isodasti), ukujika ibala kumphakathi womthi ohamba incindi kunye nexolo, kunye nokufa komthi ngasemva okanye encamini. Symptoms are unique to each tree species. Iimpawu zifana zodwa kuhlolo lomthi ngamnye. Ukuza kuthi ga ngoku, akukabikho sisombululo siphangaleleyo sifumanekileyo.

Uyango ngamachiza ngohlobo lwezibulala-zinambuzane ezikhoyo kunye nezibulala-mngundo ukuza kuthi ga ngoku azibanga yimpumelelo kuba amabhungane egrumba ngaphakathi kwintulu yomthi. Ukutshintsha njengendlela yokuthintela ukunwenwa kosuleleko nako ngokunjalo akuyompumelelo, kuba amabhungane asuka abhabhe abaleke ebushwini.

Nakuba kunjalo, uMasipala waseOverstrand uyasebenzisana ngokupheleleyo neFABI ukunceda ukugcina olu suleleko luphantsi kweliso. Ukuza kuthi ga ngoku, nakuba kunjalo, sibongoza bonke abanini-zindlu nabamelwane abachaphazelekayo ukuba bayiqwalasele imithi ekuhlaleni kwabo rhoqo ukuqwalasela naziphi na iimpawu zokusuleleka yishotholeborer (ibhungane elimnyama). (Khangelisa isalathiso sokubonwayo ukuqwalasela iimpawu zangaphandle.) **Ukuba ezinye zezi mpawu ziyaqapheleka emithini okuthetha ukuba usuleleko yi-PSHB, kucelwa ukuba uyichaze ngoko nangoko kumlawuli womyezo omkhulu waseOverstrand u- Lauren Rainbird (028 313 8972) okanye kwa-Environmental Management Services (028 316 3724) okanye uthumele i-imeyili apha [enquiries@overstrand.gov.za](mailto:enquiries@overstrand.gov.za). Khumbula ukuba intsebenziswano yenu ibaluleke gqitha ukuba sifuna ukulawula lo mgcipheko kwimithi yethu.**

**FABI Polyphagous Shothole Borer (PSHB) External Symptom Types**

Compiled by ZW de Beer, FABI. <https://www.fabimnet.up.ac.za/>

**IMIBHALO NEMIZOBO ENGCOLISA**  
**KWIINDAWO ZOLUNTU**  
**LULWAPHULO-MTHETHO OLUNGENANTSINGISELO**

UJohan du Toit, ongowesibini kokwegunya lolawulo kwikomiti yonyanzeliso-mithetho kamasipala, uidekile luthotho lwezenzo zokungcoliswa okwenzeke kummandla waseOverstrand kutshanje.

"Nangona ingeyonto ixhomisa amehlo njengokulahla izinto ngokungekho semthethweni," utshilo uDu Toit, "izenzo ezinjengezi zixhomisa amehlo kuMasipala waseOverstrand kuba oku kungaphelele nje ekudaleni ukungcola, kodwa kubangela ingozi kwezempilo.

Kutshanje, ikomiti yethu kunyanzeleke ukuba mayisuse igraffiti - enye yayo ibhlambela kakhulu - ukususela kwiindonga zemiqolomba eziseGearing Point, yaye andingethandi ukunaba ngohlobo lokungcola okuqatywe kwiindonga zezindlu zangasese ekwanyanzeleka ukuba zisizule."

Amagosa onyanzeliso-mithetho kamasipala benza konke okusemandleni ukuyisusa le ngxaki, kodwa uMasipala uhlaba ikhwelo kumntu wonke ukuba ancede achaze naziphi na izenzo ezingekho mthethweni/ezinganandiphekiyo kwigumbi lezolawulo leeyure eziyi-24 kwa-028 313 8000/8111 ngoko nangoko.

Ukuchaza indawo ekwenzeke isenzo eso kanye nokunika inkcazo yomntu/yabantu ababandakanyekayo kuya kunceda ngokuqinisekileyo ekubanjweni kwabaphuli-mthetho.
