

BUDGET 2019/20:

Despite the unforeseen and unpredictable, Overstrand still sound

At a meeting held on 29 May 2019, Council approved Overstrand Municipality's final 2019/20 Integrated Development Plan Review as well as the local authority's operational and capital budget for the fiscal year commencing 1 July 2019. Combined, operational and capital expenditure for 2019/20 totals R1 511 639 809 billion; Operational R1 249 962 889 million and Capital R261 676 920.

In his budget speech, Overstrand's Executive Mayor Alderman Dudley Coetzee pointed out that the challenges experienced in the course of 2018/19 with regards to emergency housing and related basic services as well as the devastation caused by wild fires earlier this year had a considerable impact on the 2019/20 budget. "Nevertheless," he said, "we believe this budget will fund the development needs of our communities as articulated in the second review of our current five-year IDP (i.e. 2019/20 IDP review). Where appropriate, funds were transferred from low- to

high-priority programmes so as to maintain sound financial stewardship. A critical review was also undertaken of expenditure with regards to cost-containment measures and non-core and 'nice to have' items." The approved capital budget for 2019/20, amounting to R261.7 million, is 49.7% higher compared to the 2018/19 adjustments budget. This increase is mainly due to roll-over projects amounting to R61 million from the 2018/19 adjustments budget, year-on-year fluctuation and the allocation of the housing grant between top structures (operating) and services infrastructure (capital). Also included in the capital budget is a provision of around R14.3 to cover projects emanating from the IDP / Budget public-participation processes.

"During the 2019/20 financial year, we will continue to implement further capital projects to address ageing water reticulation systems as well as sewerage treatment projects and, importantly, also storm-water projects," the Mayor said.

Property rates for households, businesses and undeveloped erven will increase by 5.7%, as will water and sanitation services. Refuse removal will, however, increase by 12.86% and electricity by 13.07% on average.

With reference to personnel expenditure, the Mayor indicated that budgeted salary increases and notch adjustments are in keeping with the current three-year agreement reached with SALGBC which came into effect on 1 July 2018. Furthermore, councillors' remuneration has been factored into the 2019/20 budget at the same rate as the 2018/19 determination since an indication from the Minister of Cooperative Governance and Traditional Affairs is still awaited in this regard. Copies of the final IDP Review and documentation pertaining to the approved budget are open for inspection at the offices of all area managers, all public libraries within the municipal area and on the municipality's official website.

BABOON MANAGEMENT JOINT TASK TEAM CONSIDERS PRACTICAL MEASURES FOR MANAGEMENT OF PROBLEM BABOONS IN THE OVERSTRAND MUNICIPAL AREA.

The Overstrand Municipality (OSM), the Western Cape Nature Conservation Board (CapeNature) and the Department of Environmental Affairs and Development Planning (DEA&DP) signed a Compactum (i.e. agreement) in March 2019 in furtherance of their mutual obligations to work co-operatively under the provisions of Chapter 4 of the Intergovernmental Relations Framework Act, 2015 (Act 13 of 2005). The compactum represents the effort made by the parties to find consensus on what practically needs to be done to address problem baboons in the Overstrand municipal area.

The agreement relates to the approximately 14 baboon troops of varying sizes comprising about 450 animals in total that occur within the Overstrand municipal area, including in hotspot areas which experience the frequenting of baboons within the urban area more than the rest of the OSM area. These areas currently are Pringle Bay, Kleinmond, Betty's Bay, Onrus River, Voëlkop, Hermanus Heights and Fernkloof.

Environmental factors such as fire or drought can also change the behavioural patterns of the baboon troops and therefore the risk potential of areas can change sporadically, as have been experienced within the Overstrand.

It is important to note that risk categorisation of areas where troops are more active at this moment could change due to the influence of external environmental factors.

The first step in terms of the Compactum has been the establishment of a Baboon Management Joint Task Team (BMJTT) for the purposes of compiling a Strategic Baboon Management Plan for the Overstrand municipal area. The purpose of the BMJTT is set out in the Compactum as follows:

- 2.1. identifying and agreeing on practical measures that are necessary to deal effectively with these baboons;
- 2.2. costing the identified necessary measures;
- 2.3. agreeing on the allocation of, and the Parties' financial contribution towards, each of the identified necessary measures;
- 2.4. considering the establishment, and potentially recommending terms for, a joint decision-making structure to maintain oversight over the persons tasked with implementing the identified necessary measures, as well as to deal on a consensual basis with contentious or sensitive matters that may arise; and
- 2.5. negotiating the terms of an implementation protocol that gives effect to the above, which protocol will then provide for the joint management of these baboons in terms of a strategic baboon management plan (hereinafter referred to as: "the SBMP").

The BMJTT has already met twice (on the 20 March and 18 April 2019). At these meetings the overall desired outcome and results for the Overstrand SBMP 2019 to 2024 were discussed, as well as the outputs and actions, timeframes, responsibilities and budgets for an Implementation Schedule for the first three years of this period. The key outcomes that have been prioritised for the purpose of the SBMP are: adaptive management informed by sound monitoring and evaluation and scientific research; efficient regulatory requirements and support; baboon troops monitoring and fences (including virtual fences) aimed at keeping baboons out of urban areas; waste management (ensuring that waste is inaccessible to baboons); and public communications and awareness. The parties are in agreement that enabling stakeholder cooperation and citizen partnership will enhance localised institutional support. Whilst the SBMP is not finalised the parties are hopeful that this can be agreed shortly with the finalisation of an agreed budget and allocation of tasks to follow shortly thereafter. This will enable the finalisation and implementation of the SBMP as well as improved support for and partnership with local residents. *Statement issued by: Overstrand Municipality, CapeNature and the Department of Environmental Affairs and Development Planning on Baboon Management in the Overstrand Municipal Area.*

NEW BANK ACCOUNTS FROM 1 JULY 2019

As from 1 July 2019 the municipality will be partnering with NEDBANK for banking services. It is our endeavour to make the transition as smooth as possible for all our clients. Clients paying via the debit order system need not make any changes as the necessary details will be updated by the municipality.

Those clients who pay accounts via EASYPAY, PAY@ or SAPO need only to present their latest municipal account at the pay point. The new banking information will be pre-printed on the account.

The following new bank accounts will be available for the payment of municipal accounts and traffic fines:

OVERSTRAND ACCOUNT PAYMENTS: Account number 1190136899

This account is solely for the payment of monthly municipal accounts and the payment must include the 12 numerical digits account number as the reference. Clients who are paying via the internet are requested to update their beneficiary details in this regard.

OVERSTRAND TRAFFIC FINES ACCOUNT: Account number 1190137186

This account is solely for the payment of Overstrand Municipality traffic fines and the payment must include the 10 to 16 alpha-numerical digits reference number indicated on the fine. Please note that the "/" must not be included in the reference number.

TOP 10 PRIORITY PROJECTS

Project Description	Ward	Amount
Water Master Plan Implementation	Overstrand	16 286 360
Upgrade Hawston Sport Complex	Ward 08	15 577 530
Masakhane IRDP (296) (Housing project)	Ward 01	11 113 300
Hermanus New Waste Management Facility	Overstrand	10 000 000
New Reservoir for Pringle Bay	Ward 10	9 175 105
Hermanus: MV & LV Upgrade / Replacement (Electricity)	Ward 03	8 871 500
CBD Regeneration Program	Ward 03	7 644 182
Blompark Housing Project Bulk Stormwater	Ward 02	7 485 744
New 4ML Reservoir	Ward 01 & 02	7 098 256
Gansbaai CBD Sewer Network Extension	Ward 02	6 574 574

2019/20 BUDGET IN A NUTSHELL

Total Revenue:

R1.244bn [up by 8.3%]
 R1.6m [Equitable share - Housing]
 R25.1m [Top structure]

Total Expenditure:

R1.250bn [up by 8.3%]
 Shortfall of R76.4m

Tariffs:

Property Rates 5.7%
 Electricity Basic charge 15%
 [Consumption costs across the inclining block will rise between 12% & 13%]
 Water 11.5 %
 Sewerage 5.7%
 Waste Removal 12.86%

Capital Budget:

49.7% increase in Capital Budget amounting to R261.7m Additional projects R14.2m.
 Roll over projects from 2018/19 amounting to R26.5m

Water: Only indigent households receive first 6 kℓ free. An increase of 11,5% to water consumption ranging from 0 to 6 kℓ per month.

Sewerage: Sewerage removal tariffs will increase by 5.7% which is decreased by 3% from last year

Waste Removal: The tariff for waste removal will increase by 12.86%

WATER QUALITY AT MUNICIPAL WATER SCHEMES

OCTOBER 2018 - MARCH 2019 DESCRIPTION OF TEST	UNIT	STANDARD AS PER SANS 0241	AVERAGE TEST RESULTS FOR POTABLE WATER TEST SAMPLES AT:								
			Buffelsrivier (Rooi Els, Pringlebaai & Betty's Bay)	Kleinmond	Hermanus	Stanford	Gansbaai	De Kelders	Pearly Beach	Baards-keerdersbos	Buffels-jagsbaai

E.coli	Count/100ml	0	0	0	0	0	0	0	0	0	0

The Department of Water & Sanitation (DWS) recommends that municipalities periodically publish information on the quality of drinking water supplied to consumers. Water quality is measured against Code 0241 as set by the South African National Standards (SANS) for drinking water.

On the accompanying drinking water quality table the average scores attained by Overstrand Municipality's nine water treatment plants from October 2018 to March 2019 can be seen. Water samples are collected monthly by an accredited laboratory where different bacteriological, chemical and physical parameters are measured.

Overstrand Municipality's water quality is of an outstanding quality, with 100% of the average results complying with Code 0241 as set by the South African National Standards (SANS) for drinking water.

When the drinking water quality does not comply with SANS 0241, corrections are made at the water purification works and in the reticulation network if applicable. The drinking water quality is then retested against the SANS 0241 limits for compliance.

WASTE WATER EFFLUENT QUALITY

OCTOBER 2018 - MARCH 2019 DESCRIPTION OF TEST	UNIT	DWS GENERAL AUTHORISATION STANDARDS (Applicable to all WWTW's except Hermanus)	AVERAGE TEST RESULTS FOR FINAL EFFLUENT TEST SAMPLES AT:					Hermanus Permit Authorisation Standards
			GANSBAAI	HAWSTON	STANFORD	KLEINMOND	HERMANUS	
pH	(pH)	5.5-9.5	6,8	7,6	7,5	7,5	7,3	5.5-9.5

Nitrate nitrogen	(mg/l as N)	15 Max	4,8	1,1	8,9	1,3	1,3	17 Max
Nitrite nitrogen	(mg/l as N)		0,2	0,3	0,2	0,4	0,2	
Total suspended solids	(mg/l)	25 Max	7	9	16	20	8	25 Max
Ortho-phosphate	(mg/l as P)	10 Max	2	5	4	4	2	10 Max

The Department of Water & Sanitation (DWS) recommends that municipalities periodically publish information on the quality of drinking water supplied to consumers as well as final waste water effluent quality results.

Waste water effluent quality is measured against standards as set by DWS, which are classified as either General Standards, or Special Standards.

The table for waste water effluent quality illustrates Overstrand Municipality's average effluent quality parameter measurements at the 5 treatment plants over the past six months. Samples are taken for analysis on a monthly basis by accredited laboratories.

Overstrand Municipality's final waste water effluent quality complies 93% overall.

When the final effluent quality does not comply with the General Standards, corrections are made at the treatment works. The final effluent quality is then re-tested against the General Standards for compliance.

MUNICIPAL ACCOUNTS: WHAT 2019/20'S MONTHLY MUNICIPAL ACCOUNTS WILL LOOK LIKE

MONTHLY BASKET OF TARIFFS - SINGLE RESIDENTIAL 2019/20

HPP - Hermanus Public Protection

SHORT HOLE BORERS A REAL THREAT TO TREES - AN APPEAL TO HELP CONTAIN THIS INFESTATION

A current invasion by a beetle commonly referred to as the polyphagous short hole borer (PSHB) has resulted in the death of thousands of trees all over the country.

The beetles attack various tree species by digging tiny tunnels to lay eggs. On top of that, they carry a fungus on their bodies which they "farm" as food source. This fungus blocks the tree's internal transport system which, depending on the tree species and level of infestation, will eventually cause the demise of the tree.

In an attempt to keep this infestation in check, Overstrand Municipality appeals to all property owners, and concerned neighbours, to check trees for signs of the following:

- Gum or sap oozing on the bark
- Visible entry and exit holes
- Sugary exudates
- Sawdust or frass (excreta) visible around holes
- Fungal staining on sapwood or outer bark
- Dieback of part of the tree or the entire tree

Currently, there is no fully effective or registered treatment for either the insect or the fungus. Severely infested trees are removed and destroyed in order to contain the spread of the disease.

However, given that special care must be taken during the entire removal process (i.e. cutting down, chipping, transporting and disposal), members of the public are urgently requested not to cut down infested trees and transport infested material to any dump or tip sites. This may spread the fungus into unaffected areas.

Should any of the above symptoms be observed in trees that suggest infestation by PSHB, please contact the Environmental Management Services Department on (028) 316-3724 immediately so that the necessary steps can be instituted to contain the risks.

To read more about the invasive beetle, visit <https://bit.ly/2SfuySw>. Further information is also available at www.fabinet.up.ac.za/index.php/research/7

Typical signs of infestation by PSHB

Are you a farmer? You may qualify for a rebate!

Agricultural properties will be rated at the "FARMS" tariff, subject to the owner/farmer providing the municipality with proof that the property is used for bona fide farming purposes.

Application forms are available on our website.

Any queries with regard to the above can be directed to Overstrand's Rates and Data Control Office at (028) 313-8000, faxed to (028) 312-1894 or sent via email to enquiries@overstrand.gov.za.

Pensioner or disabled? Perhaps you qualify for a rebate!

Retired and disabled persons qualify for special rebates on property rates, according to their total gross monthly household income. To qualify for the rebate:

- The owner/s must be a South African citizen/s
- The applicant/s must be the registered owner/s
- The owner/s must occupy the property as his/her/their primary residence
- The owner/s must be at least 60 years of age or in receipt of a disability pension from the state
- The gross monthly household income may not be more than eight times that of a state-funded social pension per month (R14 240)
- The applicant/s may not be the owner/s of more than one property

Application forms are available on our website.

Any queries with regard to the above can be directed to Overstrand's Rates and Data Control Office at tel. (028) 313-8000, faxed to (028) 312-1894 or sent via email to enquiries@overstrand.gov.za.

PARKING FEES YET AGAIN EFFECTIVE IN HERMANUS

Following on a couple of weeks where motorists enjoyed free parking in Hermanus' CBD, please note that parking management operations have resumed towards the end of May.

Normally, the parking tariffs are R1 for 15 minutes, R2 for 30 minutes (or part thereof) and R4 per hour on Mondays to Fridays between the hours of 08:30 and 16:00. On Saturdays, working hours are from 08:30 - 13:00 and parking fees are R4 per hour, irrespective of whether you park for 15 or 30 minutes. Parking will be free of charge on Sundays and public holidays.

The parking attendants are dressed in black, wear yellow safety bibs and all have electronic machines that print a slip depicting the time spent and paid for.

In the evenings and on Sundays/public holidays when there are no parking attendants, fees do not apply.

You do not have to pay local car guards (dressed in green, orange or yellow fluorescent safety vests) but can give a tip for the time spent watching your car. This is optional but gratefully accepted by those less fortunate who are trying to earn their keep.

Parking is paid for upfront to one of the marshals assigned to a parking area. If you stayed longer than what you had paid for, you can settle the outstanding amount with the parking attendant when you return to your vehicle.

Note, too, that free parking is available at Hoy's Koppie (opposite Checkers) and on the grounds of the NG Church, Hermanus and at Gearing's Point.

Remember, parking fees levied by shopping centres such as Woolworths and Checkers on their own private land are determined by the operators of those centres as these are not municipal property.

Parking disks

Business owners also have the option to obtain a permanent parking disk from AFRISERV at a cost of R320 per month. Their offices are situated in 12 Royal Street, Hermanus.

Complaints

Complaints regarding parking marshals can be directed between 08:00 and 16:30 to Phillip Kapa 072 588 8618 0725888618@vodamail.co.za.

Should you not have the relevant parking marshal's name, quote the date and time and state the area.

Drilling of two new boreholes in Hermanus underway

To expand its groundwater capabilities in an attempt to meet the growing demand for water in the town, Overstrand Municipality will be drilling two new boreholes in the vicinity of the Gateway Shopping Centre. Drilling is scheduled to commence early June and is expected to continue for three weeks.

Both boreholes are on municipal land within the vicinity of Mountain Drive across the R43 from the Gateway Shopping Centre.

The boreholes will be drilled to a depth of approximately 300 metres and are designed to target the deeper peninsula formation aquifer and will, therefore, not affect the shallower aquifers from which most households abstract their groundwater.

It is anticipated that water strikes will occur during the drilling process. These will result in large amounts of non-potable water being ejected from the ground, potentially in excess of 50-100 litres per second, which will be captured and disposed of in storm-water drains.

Given that drilling will result in noise and dust generation, it will only take place during the day. Furthermore, the impact on nearby residents will be mitigated as best as possible, and they will be informed prior to drilling commencing.

Drilling is estimated to last between one and two weeks per borehole. Note, though, that pump testing will last a week and this will be a 24-hour activity.

Niel Rademan (piano), Corneil Müller (cello), Lucas Heinen (accordion) and Louis Jones (percussion) will entertain the audience with a classical karett-style programme in the Civic Auditorium on Sunday, 18 August, at 15h30. Items will include SONS, AMSTERDAM, POR UNA CABEZA and AL LÊ DIE BERGE NOG SO BLOU.

Tickets cost R150 (R60 for students) and will be available from the Tourism Office early in August (028 312 2629). Contact René du Plooy on 082 940 4238 for further information.

The ANNUAL OVERBERG EISTEDDFOD PRESTIGE CONCERT will be held on Tuesday evening, 27 August, at 7 pm. Tickets will be available at the Tourism Office in Hermanus (028 312 2629) and cost R40.
