LED Maturity Assessments of Municipalities in the Western Cape

Commissioned by

Provincial Government of the Western Cape:
Regional and Local Economic Development
in partnership with SALGA Western Cape

OVERSTRAND MUNICIPALITY

08-09 December 2015

Mark Lakay, Andile Magadla

Objectives

The objectives of assessment of LED capacity is to:

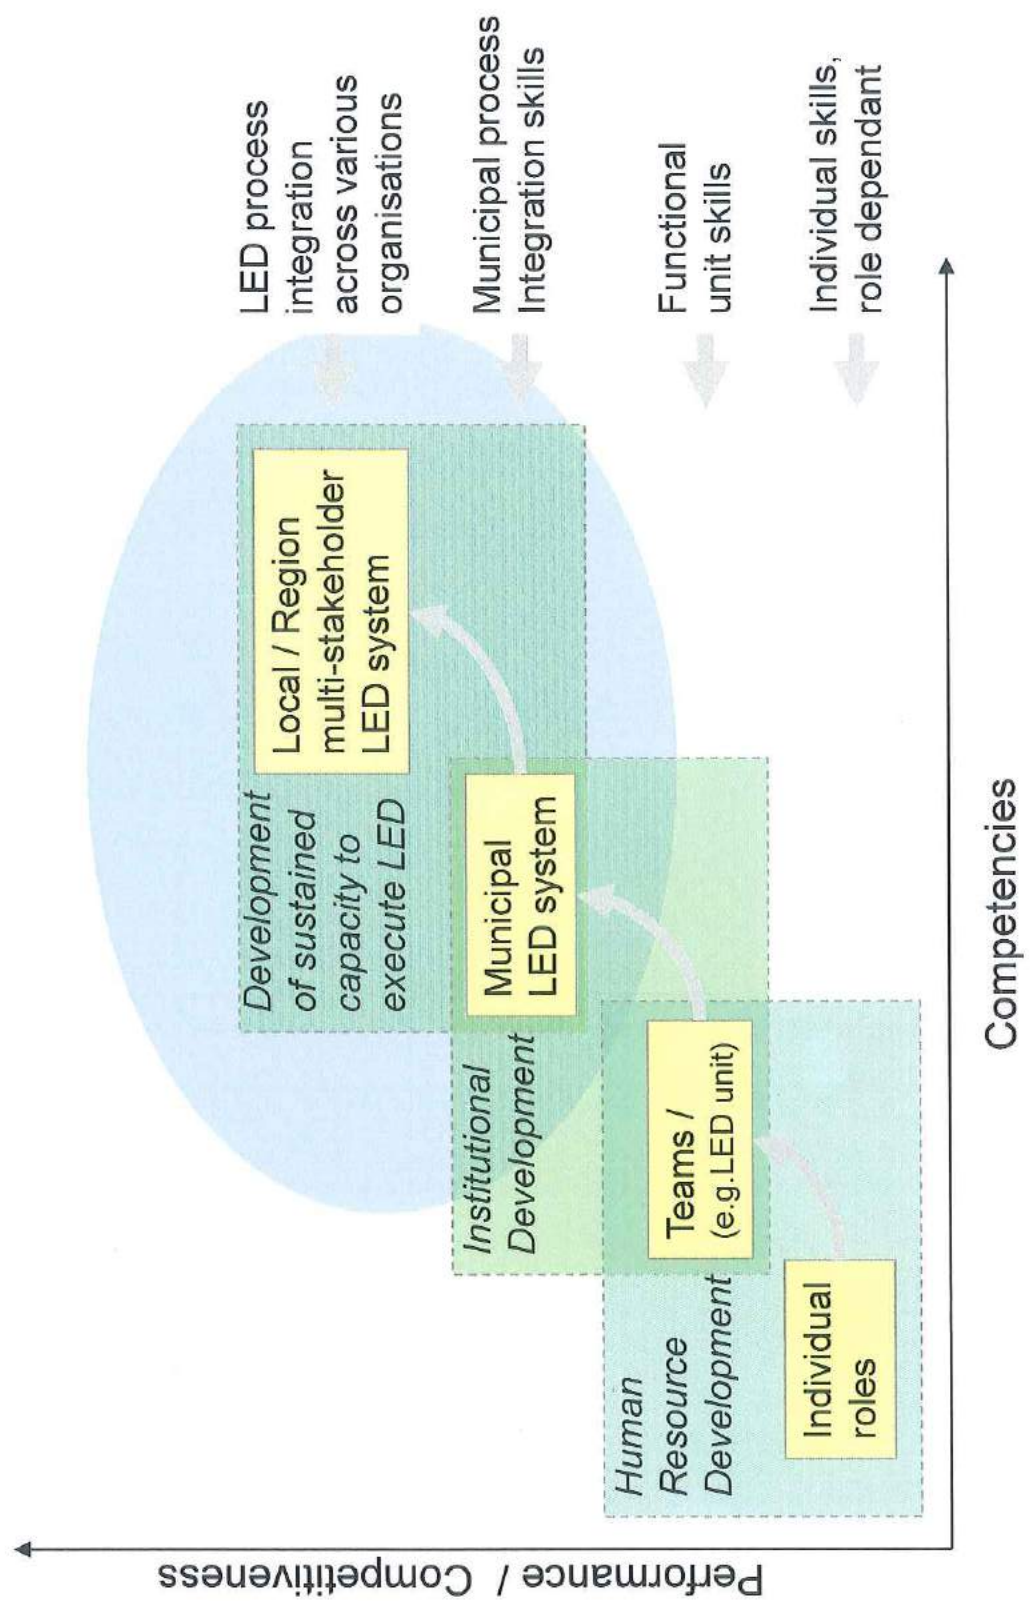

- Identify and highlight cases of sound LED practices,
- Identifying gaps at municipal level,
- Enable municipalities to identify areas for improvement, and
- Establish a structured pattern of support to improve LED practices.

Impact chain:

3/8

LED maturity assessments look for "LED systems" capacity

The Assessment Scale (0 - 5)

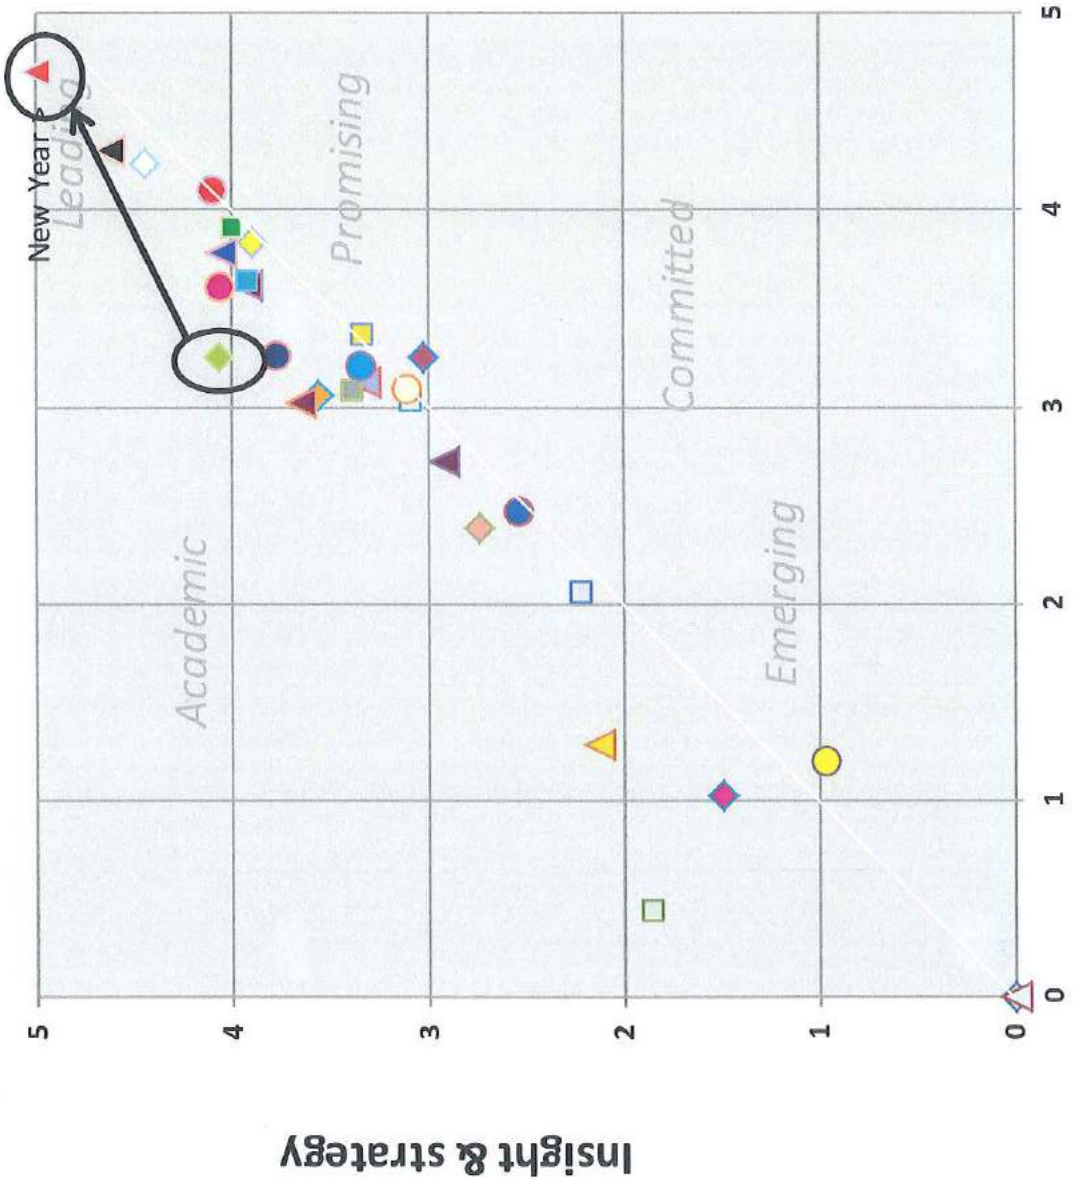

The assessment scale guidelines are based on assessing progress down a learning curve on each topic. Six key milestones have been chosen on this learning curve, and are listed below:

- | | |
|---|-----|
| 0. Don't know, don't care about. | 0/5 |
| 1. Aware of need to. | 1/5 |
| 2. + Trying something. | 2/5 |
| 3. + Now know what to do and how. | 3/5 |
| 4. + Now starting to do the right things. | 4/5 |
| 5. Consistently performing = excellence, best practice. | 5/5 |

Overstrand - Performance in Key Areas

7/8

Overstrand - Performance trends in key areas

Learning opportunities

Overstrand Municipality shows significant improvement in most dimensions. The Municipality is systematically doing most of the basics well. Sound leadership is displayed and LED has been elevated as the main agenda across municipal functions.

Suggested areas of improvement focus as follows:

- 1. Organisation of the governance functions**
 - Numerous governance structures and dialogue events (some Town focused)
 - Not sure where the holistic picture is dealt with consciously and systematically
 - Requires M&E below to work, in order to see what is going on or not.

- 1. Monitoring & Evaluation**

- Improve M&E system – stakeholder participation is key.
