16. COVID 19

At midnight on 26 March 2020, the President of South African imposed a nationwide lockdown on South Africa which permit only essential services staff to continue working. The lockdown was imposed on the country after WHO (World Health Organization) declared COVID- 19 a pandemic on 30 January 2020. The categories of people exempted from the lockdown included health workers in the public and private sectors, emergency personnel, those in security services – such as the police, traffic officers, military medical personnel, soldiers – and persons necessary for our response to the pandemic

A25

The initial lockdown period was set from midnight on Thursday 26 March 2020 until midnight 16 April 2020. Due to the continuation of increase in infections the President on 23 April introduced five levels to avoid opening of the economy. The five tiers are:

- Level 5 means that drastic measures are required to contain the spread of the virus to save lives
- Level 4 means that some activity can be allowed to resume subject to extreme precautions required to limit community transmission and outbreak.
- Level 3 involves the easing of some restrictions, including on work social activities, to address a high risk of transmissions.
- Level 2 involves the further easing of restrictions, but the maintenance of physical distancing and restrictions on some leisure and social activities to prevent a resurgence of the virus.
- Level 1 means that most normal activity can resume, with precautions and health guidelines following at all times.

To ensure that our response to the pandemic can be as precise and targeted as possible, there will be a national level and a separate levels for each province, district and metro in the country.

The response to incidents during the Fire Season will be depend on the lockdown level tier which South Africa is in. A fourth wave is likely to occur if residents of South Africa do not adhere to the safety protocols and lockdown regulations.

Overstrand Fire & Rescue operational staff, in conjunction with Disaster Management staff, assist with the distribution of food items, PPE and other essential items in an attempt to assist with containing the spread of

A26

the virus. Staff members were split into two groups consisting of a decontamination team and operational team, to avoid cross – contamination. All health protocols are strictly observed and followed when responding to any incidents. The Fire & Rescue will respond according to the concept SOP as defined by Provincial Government
