Motivational report for 40 Krige street, Onrus. ERF 2359

(A) Proposed development

We would like to raise the boundary wall between ERF 2359 and ERF 2357 to provide some privacy between the two house's entertainment areas. As both houses have their entertainment areas raised above the ground floor level there is no visual or audible privacy between the two said properties. Both entertainment areas are raised higher than the allowed boundary wall height of 2.1m above NGL. This change will have no impact on the accessibility of the property, the main road network, or any other infrastructure.

(B) Character of the environment

The raising of the said boundary wall will facilitate in creating much needed privacy between the two neighbours. It will not obstruct any view of any other neighbour and have little to no impact on the street scape.

(C) Desirability if the proposed utilization

This design will primarily benefit the adjacent neighbour as it will create both visual and audible privacy from the entertainment areas which are typically busy noisy areas.

(D) Investigations carried out in terms of other laws which are relevant to the consideration of the application

Not applicable

(E) The impact of the proposed land development on municipal engineering services

(F) Consideration of forward planning and land use documents

Photograph showing the entertainment area proximity

Amendment, suspension, or removal of restrictive conditions.

We feel that the removal of the height restriction of the boundary wall between the two properties will without a doubt be to the benefit of both properties concerned. As it stands now neither party will feel comfortable enjoying their entertainment areas. The raising of the boundary wall has only positive connotations with no negative aspects. The raised boundary wall will only screen the houses from each other and not block any views. We have already chatted to the neighbour, and they are as eager as us for this change in wall height.

Kind regards
